# Gascontrol Webvisio

Remote and Control - Function via Ethernet for controlling of software Gascontrol.

Benefits

- login via passwort
- same function like Gascontrol program in the gas mixer
- same readout and menu navigation on display
- for using no relearning required
- quality control by means of data recording and storing
  - date and time
  - user (name or examiner)
  - process data tracing

- export data interface for further interpretation of measured data in MS EXCEL®
  import data from program to the unit
  - product data
  - administration of user names inclusive access code
- starting of remote and control function by standard internet browser
- multilingual (depending on gas mixer control)

Retrofit on request.
